FALL 1998

## Excellence In Teaching

**A**s *Inspire* features the Department of Science and Mathematics in this issue, Professor Terry Phipps '70 surfaces as one of the great strengths of the department. For the past 20 years, this professor of biological sciences has seen the department grow in size, curriculum, and quality to become one of the largest departments of the College. Terry has personally contributed to the department's credibility through his own excellence in teaching and research.

Terry's interest in the biological sciences goes back as far as elementary school and grew under the tutelage of a high school biology teacher. As a student at Cedarville College, he found the science department to be fairly small. "Yet," he says, "the faculty members—some of them are still here—were excellent instructors. They were personable and easy to work with."

After his military service in Vietnam, Terry completed his M.S. at Wright State University. While he was teaching environmental technology at The Ohio State University's Mansfield, Ohio branch, Dr. Clifford Johnson, then Cedarville's academic dean, asked him to consider teaching at Cedarville. "As God had opened and closed doors and placed me in different positions," Terry shares, "I believe He was preparing me to come back to Cedarville College."

Returning to his alma mater, Terry found the science department still relatively small, but changing to encompass more research and provide science classes for new corollary programs, nursing and engineering. Adding to the credibility of the department were new facilities, sophisticated equipment, and more faculty whose expertise and experience built on the strong academics already in place. "It's been the work of God that has brought us the people we have," says Terry. "Everyone seems to mesh very well together. Everyone works as a unit. I've never been in a work situation where the people have been more congenial and helpful."

With all the advances, Terry stresses that the department continues to be very service-oriented to the students. "They receive the same personal help and direction for growth that I experienced as a student, all in a framework of very strong academics." He says there are more and more opportunities for students to learn by doing.

Terry's personal research has involved zoological plankton in Lake Erie. He has conducted research and taught courses at Stone Lab (OSU's aquatic lab on South Bass Island near Sandusky, Ohio) and has taught limnology (fresh water biology) at AuSable Institute near Traverse City, Michigan.

Family is a big part of Terry's life. His wife, Rita '71, serves as principal of Graham High School in St. Paris, Ohio, where Terry has been approached to help Graham's state champion wrestling team with their strength training. Terry and Rita's two daughters, Heather '93 and Shannon '95, are preparing for medical careers. The family enjoys biking, inline skating, and weight training.

Terry shares that the Lord has opened doors for evangelism in the gyms where the family works out. "I'll work out with some of the kids there, and they'll often ask me for help since I've studied and know about exercise," he explained.

Through the years, the Lord has directed Terry into several community opportunities, which include serving on the school board at Greeneview School District and as board president of the Greene County Career Center.

Dr. Terry Phipps seeks to be a good model through his dedication to students and research. His devotion to his family and his faithfulness in outreach demonstrate his love for the Lord. Thank you, Terry Phipps, for 20 years of significant contributions to Cedarville College.

Dr. Terry Phipps '70 works with a student.

## SCIENCE AND MATHEMATICS

### Faculty

**Daniel Wetzel, Professor, Dean of the School of Engineering, Nursing, and Science**  
B.S., Morehead State College; M.S., University of Cincinnati; Ph.D., The Ohio State University; Alumni Association's Distinguished Service Award, 1992; Department Chair, 1989-1998; At Cedarville since 1963.

**Dennis R. Flentge, Chair, Professor of Chemistry**  
B.S., Texas Lutheran University; Ph.D., Texas A&M University; Postdoctoral research experience: University of Florida, Texas A&M University, and the Air Force Research Laboratory; At Cedarville since 1980.

### Chemistry

**Larry Helmick, Professor**  
B.A., Cedarville College; Ph.D., Ohio University; Postdoctoral research experience: University of Florida, University of Illinois, NASA-Lewis Research Center, and the Air Force Research Laboratory; Alumni Association's Distinguished Educator Award, 1990; At Cedarville since 1968.

**Douglas Miller, Professor**  
A.A., Baptist Bible College of Pennsylvania; B.S., University of Rochester; Ph.D., University of Colorado; Postdoctoral research experience: University of Iowa, City University of New York, NASA-Lewis Research Center, and the Air Force Research Laboratory; At Cedarville since 1984.

**Mark McClain, Assistant Professor**  
B.A., Cedarville College; Ph.D., University of Michigan; Postdoctoral research experience: Sandia National Laboratories and the Air-Force Research Laboratory; At Cedarville since 1996.

### Earth Science

**John Whitmore, Assistant Professor**  
B.S., Kent State University; M.S., Institute for Creation Research; At Cedarville since 1991.

### Biology

**Donald Baumann, Professor**  
B.S., Iowa State University; M.S., Iowa State University; Ph.D., Iowa State University; Department Chair, 1967-1989; At Cedarville since 1964.

**Joseph Francis, Associate Professor**  
B.S., Michigan State University; Ph.D., Wayne State University; Postdoctoral fellow, Department of Pediatrics, University of Michigan; At Cedarville since 1992.

**Heather Kuruvilla, Assistant Professor**  
B.S., Houghton College; Ph.D., State University of New York at Buffalo; At Cedarville since 1997.

**Terry Phipps, Professor**  
B.A., Cedarville College; M.S., Wright State University; Ph.D., The Ohio State University; At Cedarville since 1978.

**John Silvius, Professor**  
B.A., Malone College; graduate study, Western Michigan University; Ph.D., West Virginia University; Postdoctoral experience: University of Illinois; Faculty Scholar Award, 1995; At Cedarville since 1979.

**Dennis Sullivan, Associate Professor**  
B.S., Youngstown State University; M.D., Case Western Reserve University; Diplomate, American Board of Surgery; Fellow, American College of Surgeons; Missionary Service (Baptist Mid-Missions), Haiti and Central African Republic (1988-1996); At Cedarville since 1997.

### Mathematics

**Edwin Braithwaite, Associate Professor**  
B.A., Western Washington University; M.A., Western Washington University; Ph.D., University of Illinois-Urbana-Champaign; At Cedarville since 1976.

**Darrin Frey, Assistant Professor**  
B.S., University of Nebraska; Ph.D., University of Michigan; Honors: Runner-up for the annual Sumner-Myers award for best math Ph.D. thesis at the University of Michigan; At Cedarville since 1997.

**Joni Ormsbee, Assistant Professor**  
B.S., Wright State University; M.A.T., Miami University; M.S., Miami University; At Cedarville since 1998.

**Robert Schumacher, Assistant Professor**  
B.S., United States Air Force Academy; M.S., Air Force Institute of Technology; At Cedarville since 1993.

**James Sellers, Associate Professor**  
B.S., University of Texas at San Antonio; Ph.D., Pennsylvania State University; At Cedarville since 1992.

### Physics

**Leroy Eimers, Professor**  
B.S., Hobart College; Ph.D., Syracuse University; At Cedarville since 1981.

**Steven Gollmer, Assistant Professor**  
B.S., Pillsbury Baptist Bible College; B.S., Northern Illinois University; M.S., University of Illinois; Ph.D., Purdue University; At Cedarville since 1994.

### Staff

**Ronda Henderson, Administrative Assistant**  
Undergraduate study: Stautzenberger College; At Cedarville since 1995.

**Beth Brentlinger, Lab Instructor**  
B.A., Cedarville College; At Cedarville since 1998.

**Gordon Dingeldein, Science Laboratory Technician**  
B.S., Southern Illinois University; At Cedarville since 1996.

## Electron Microscope Donated

**D**uring the 1997-98 academic year, the Department of Science and Mathematics received an electron microscope from the Armstrong Laboratory's toxicology division at Wright Patterson Air Force Base. Kevin Geiss, a 1990 Cedarville College graduate who majored in chemistry, served as a key liaison to acquire this gift. Kevin (toxicodynamics group administrator at the lab) also helped in the transfer of the \$150,000 scanning electron microscope. The transfer resulted from a change in the laboratory's mission, which deals with assessing hazards to human health posed by exposure to operational chemicals. This gift will allow faculty in the department to develop and expand teaching and research programs focused on various microscopic methods. The presentation was made to Dr. Duane Wood, Cedarville College academic vice president; Dr. Dan Wetzel, dean of the School of Engineering, Nursing, and Science; and Gordon Dingeldein, math and science lab technician.

L to R: Gordon Dingeldein, Dr. Dan Wetzel, Dr. Duane Wood, Kevin Geiss '90

## New Schools And Deans Named

**C**edarville College Academic Vice President Duane R. Wood has announced a sweeping restructure of the College's academic departments. "Formerly, 13 department chairs, plus a number of staff managers, reported directly to the academic vice president," Wood said. "Now, the College will comprise four schools, each with a dean. The department chairs will report to the deans of their respective schools, who will report to the academic vice president."

The four new schools will be called the School of Humanities, Fine Arts, and Bible; the School of Health and Human Performance; the School of Engineering, Nursing, and Science; and the School of Social Sciences and Professional Studies.

Wood also announced the appointment of the deans of the schools. They are:

- ◆ **Dr. Jack Riggs, dean of the School of Humanities, Fine Arts and Bible.** Riggs has been on the Cedarville College faculty since 1967 and has been serving as chairman of the Department of Biblical Education and director of institutional research.
- ◆ **Dr. Donald Callan '84H, dean of the School of Health and Human Performance.** Callan has been a Cedarville faculty member since 1960. He has been serving as chairman of the Department of Health and Physical Education and as athletic director.
- ◆ **Dr. Daniel Wetzel, dean of the School of Engineering, Nursing, and Science.** Wetzel has served on the college faculty since 1963 and was serving as the chairman of the Department of Science and Mathematics.
- ◆ **Dr. Merlin Ager '60, dean of the School of Social Sciences and Professional Studies.** Ager has more than 30 years of service on the college faculty and has been chair of the Department of Education.

Dr. Duane Wood also announced new chair appointments of several academic departments. The department chairs will report to the deans of their respective schools, who will, in turn, report to the academic vice president.

The five new chairs are:

- ◆ **Dr. Floyd Elmore '77, chairman of the Department of Biblical Education.** Elmore has been on the College faculty since 1985.
- ◆ **Dr. W. Philip Bassett, chairman of the Department of Education.** Bassett has been on the Cedarville faculty since 1991.
- ◆ **Dr. Dennis Flentge, chairman of the Department of Science and Mathematics.** Flentge has served Cedarville College since 1980.
- ◆ **Edward Spencer, interim chairman of the Department of Language and Literature.** Spencer has been on the Cedarville faculty since 1962.
- ◆ **John McGillivray '70, chairman of the Department of Exercise and Sport Science.** McGillivray has been on the College faculty since 1974.

In addition, Pete Reese '60, director of athletic facilities, has been named Cedarville College athletic director.

## Outstanding Medical Student

**J**ohn Maskill, a premedicine major, graduated from Cedarville with highest honors in 1997. He received a full scholarship to Wayne State University School of Medicine in Detroit, Michigan and began classes in the fall of 1997 with 260 other freshman medical students. During the 1997-98 academic year, John earned the top academic standing in his class. John states, "The undergraduate preparation at Cedarville College for medical school was excellent!" He also gives the glory to God for the ability and opportunity to learn. John's desire is to become a surgeon so that when opportunity presents itself, he can use his skill in third world countries and on the mission field. For the past two summers, John has traveled to the Philippines to work at Bethel Baptist Hospital on the island of Mindanao, about 600 miles south of Manila. This summer, John led a team of four Cedarville College students to the hospital to assist in surgery, deliver babies, teach, and learn through Association of Baptists for World Evangelism. John believes experiences like this will add to classroom learning and is thankful for the opportunity.

## From The Director's Chair

**D**issecting a frog in my high school biology class was one of those milestones in my life. After all, it wasn't every girl who could cut and tug and pin and label without a qualm (of course, my knees were a little shaky afterwards!). As much as I reveled in that accomplishment, I knew from the start that math and science were not going to be "my thing."

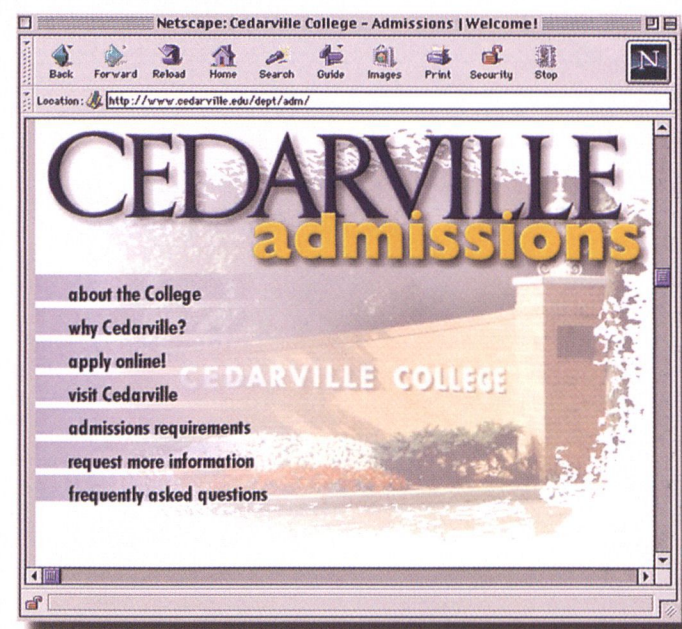

Of course, in college "general education" courses are required, and I have a few memories of those, too. Dr. Wetzel showed his perseverance as he tried desperately to explain what was undoubtedly a simple math problem to my limited understanding. Dr. Eimers, in his first year of teaching at Cedarville College, had me to contend with in physical science (I'm happy he didn't give up after that trial and continues to teach at the College today!). I remember Dr. Silvius taking a picture of my biology lab group before we went out to dig in the muck around Cedar Lake. The next day he knew all of our names.

My math and science career has been far from illustrious. However, I have developed a great appreciation for those people who are skilled in this area...especially because it's so mind-boggling to me. I'm addicted to the Weather Channel; I think Bill Nye the Science Guy is fun; and if it has anything to do with nature, I soak it in. It's especially exciting to see Cedarville College alumni not only involved, but taking the lead in many areas of the math and science industries. This issue of *Inspire* is dedicated to those who view life "Under the Microscope."

*Faith Linn '83*

## Career News

Cedarville College alumni wishing to change employment can use our web-based Resume Expert system and have their resumes reviewed by Cedarville College business and recruiting partners through web access. Call 1-888-JOB-4U11 for assistance. Many companies with whom Cedarville College has a relationship are looking for experienced employees as well as recent graduates. Get in touch with Career Services for direct contact information or access the Cedarville College homepage and click on Career Services, Job Searching Tools, Web job listings, and student access. It's as easy as [www.cedarville.edu](http://www.cedarville.edu).

## Putting FLEX Into Your Retirement Plans

**F**or years, the charitable gift annuity has been the "bread and butter" planned giving vehicle for donors enjoying their post-retirement years. A charitable gift annuity provides a gift to Cedarville College, but it also creates a current year income tax deduction, a partially tax-free fixed income stream, and some capital gains tax avoidance for the donor. The annuity payout rate is based on the ages of the donors at the gift date; the higher the ages, the higher the payout rate. For this reason, the charitable gift annuity has never held much interest for couples who are still in their working years.

But now there is a new twist: an idea that can make the charitable gift annuity attractive as a retirement planning vehicle. A flexible gift annuity allows the donor to establish the annuity now and earn a current year charitable income tax deduction, but defer the annuity payments until a future date. The donor is not required to pre-determine the exact date on which the annuity payments will begin, but must specify only the earliest and latest possible payment start dates. The range between these dates can be as much as 32 years. The decision to start the annuity payments can be made up to one year prior to the actual start date. The annuity payout rate compounds each year from the annuity date until the payments actually begin. The payment schedule and the annuity rate are then fixed as of the date of the first payment.

The flexible gift annuity allows you to adjust your income as you enjoy your retirement. You can start the annuity payments when additional income is required, or defer to a later date with an increased payout rate. The flexible gift annuity can be used to supplement payments from other retirement plans that are more rigidly structured. The Cedarville College flexible gift annuity provides a way for working age couples to create retirement income by making a charitable gift. For more information or a customized flexible gift annuity analysis, please call 1-800-766-1115, write the Office of Planned Giving, P.O. Box 601, Cedarville, OH 45314-0601, or e-mail [bartletd@cedarville.edu](mailto:bartletd@cedarville.edu).

Not Pictured: Richard Blumenstock '63*

## Founders Hall Prints Available

**I**n 1997 the Alumni Council commissioned 1981 alumna Debra Moody Stewart to create an original work of art featuring historic Founders Hall. Five hundred full color, limited edition prints were made available for Cedarville College alumni and friends to purchase during Homecoming 1997, each one personally signed and numbered by the artist. This is your opportunity to support the alumni scholarship fund and own this beautiful artwork! Prints continue to be available through the Alumni Office and at most major on-campus events. The cost for the 18" x 23" print is a \$50 contribution to the alumni scholarship fund. A 4" x 5" print will also be included with our thanks for supporting the alumni scholarship fund. To order your print, contact the Alumni Office at 1-800-837-2566.

## Intercultural Effort

**C**edarville College is determined to fulfill its biblical responsibility to be aware of and involved in intercultural issues. As a result, the position of intercultural recruitment director was established in 1996. Presently,

Kezia McNeal '92 is serving Cedarville in this capacity. The resources of the current students are being tapped, and alumni input is needed to help Cedarville establish an educational environment that reflects Acts 10:34-35. Please contact Kezia at P.O. Box 601, Cedarville, OH 45314 or via e-mail at [menealk@cedarville.edu](mailto:menealk@cedarville.edu) if you have access to resources or have ideas and suggestions that would enhance this intercultural endeavor. Cedarville College will become more effective in its mission as it draws upon the strength of current students and alumni who apply what was gained at Cedarville to impact the world for Christ.

# Celebrate '98

Be sure to attend this exciting weekend with friends and former classmates!

**Highlights include:**

- Homecoming Parade
- Larnelle Harris Concert
- Praise Concert
- 5K Road Run
- Tours of the new Technology Resource Center

- All-Alumni Chapel
- Class and Club Reunions
- Soccer and Volleyball Games
- Faculty-Alumni Breakfast

Watch for more information in your mailbox!

The Department of Science and Mathematics of Cedarville College and the Biology Department of Mount Vernon Nazarene College sponsor an undergraduate conference on bioethical issues each fall. This intensive, one-day conference gives undergraduates a chance to learn about the discipline of bioethics from a visiting scholar and to participate in discussion groups with faculty and students from colleges throughout Ohio. The goal is to teach students how to solve bioethical and biomedical ethical dilemmas using scriptural principles. The validity of the sanctity of life concept, which is an integral part of the Christian worldview, is emphasized throughout the conference. The 1998 conference theme is "The Theological Basis of Bioethics" and will feature Dr. Scott Rae as the plenary speaker.

The College hosted the 36th Annual Conference of the Fundamental Baptist Fellowship Association from July 13-17. The conference's theme was "Doing Today What Will Count For Eternity." The conference included seminars entitled "How to Prepare a Heart for God," "Fruits of a Heart for God," "Consequences of Not Having a Heart for God," and "Maintaining a Heart for God." Conference speakers included Dr. Warren Mattox, pastor of Community Baptist Church, Cleveland, Ohio; Dr. Chris Miller, associate professor of Bible at Cedarville College; and Dr. David Graham, pastor of Grace Baptist Church in Cedarville.

The FBFA is an association of predominantly African-American congregations. Its president is Dr. John McNeal (pictured), pastor of Atlanta Baptist Bible Church, Atlanta, Georgia.

A record 645 young athletes attended the Yellow Jacket Sports Camps this summer. Camps offered included sessions in boys and girls basketball, boys and girls cross country, boys and girls soccer, and girls volleyball.

Cedarville College head coaches Jeff Reep '79 (men's basketball), Kathy Freese (women's basketball), Elvin King '64N (cross country), Roger Swigart '90 (men's soccer), John McGilivray '70 (women's soccer), and Teresa Clark '75 (volleyball) served as camp directors. Each week consisted of instruction and competition as well as spiritual enrichment for all resident and commuter campers.

If you would like to get on the camp mailing list to receive a brochure for sessions in 1999, contact: Yellow Jacket Sports Camps, Cedarville College, P.O. Box 601, Cedarville, OH 45314 or phone 937-766-7755.

In June 1998, Dr. Dennis Sullivan, associate professor of biology, had the opportunity to serve as a visiting lecturer at Hue Medical College in Vietnam. He first gave a week-long block course in cardiovascular anatomy and physiology. The lectures, which were interpreted into Vietnamese, were attended by about 120 students and professors. Dr. Sullivan also worked in the operating room, giving clinical lectures and teaching surgical technique. During the second week of his visit, he met with anatomy departments and gave lectures at Hanoi Medical College and Haiphong Medical School.

Despite an intense teaching schedule, he had several opportunities to visit historic sites and see the countryside. Most importantly, he had the privilege of sharing his faith with several Vietnamese physicians.

# Alumni Profiles

## Miller Pursues Research In Antarctica

Most people head for sunshine and tropical breezes in January. Penney Stackhouse Miller '89 spent January 1998 in Antarctica performing research for her doctoral dissertation and her laboratory at The Ohio State University.

"I was one of five people from Ohio State and the University of Colorado who went to McMurdo Station on Ross Island, just off the coast of Antarctica. The research was sponsored by the National Science Foundation and the EPA. I was flown out by helicopter to several remote sites to collect water samples from partially frozen lakes. January is the height of the Antarctic summer, and temperatures approach 40 degrees most days," Penney shared. Penney and others are researching the fate of polychlorinated biphenyls (PCBs) in the Antarctic. Penney studied the chemical reactions of PCBs and sunlight and how dissolved natural organic matter (like algae) would affect these chemical reactions. "We anticipate that this research may help us to better understand how photochemical processes may influence the stability of manmade compounds that are

transported to the Antarctic environment," Penney explained.

Being out on a challenging research site like Antarctica was rewarding, but the excursion was spiritually uplifting as well. "The beauty of creation was so awesome," Penney shared. She experienced pristine scenery, magnificent wildlife, and a sun that never set. "I was even able to get together with a small group of Christians at McMurdo Station for worship and Bible study," Penney noted.

Penney continues with her research at The Ohio State University's Department of Geological Sciences. Both she and her husband, David '89, are working on their doctoral degrees while on fellowships. Penney hopes to complete her Ph.D. in about 18 months; David should complete his Ph.D. in chemical engineering this year. "After that, we are unsure where God will take us. We both enjoy academics and research, so maybe we will continue in that arena."

## The Science Of Coffee

Working for Nestle USA might sound like an incredible treat for many. Visions of candy bars and hot cocoa would beckon much like Willie Wonka's Chocolate Factory. However, it wasn't the idea of great food that lured Phil Mohler '71 to join Nestle 26 years ago. Phil was looking for a place to use his chemistry degree from Cedarville College. Nestle offered him the opportunity, and he's been using his scientific skills and abilities at the corporation ever since.

Phil began at the Regional Quality Assurance Lab then located in Marysville, Ohio and progressed to three factory labs (Fulton, New York; Ripon, California; and Suffolk, Virginia). He and his wife, Rebecca Harman Mohler '70, and three children, Sharon (23), Cedarville College sophomore Timothy (19), and Titus (15) moved to Suffolk, Virginia in 1994 where Phil currently works as quality assurance manager. Although this position at Nestle USA primarily utilizes his degree in science, Phil has also been required to be very active in the business management realm. However, Phil's favorite part of the job remains instrumental analysis, in accordance with his longtime interest in analytical chemistry.

For the past 21 years of his career with Nestle, Phil has worked in the coffee division, helping develop such labels as Nescafé, Mountain Blend, Sunrise, Hills Bros., MJB, and Chase & Sanborn. In spite of his years of close association with coffee, Phil states, "Coffee is not my beverage of choice, but my family makes up for my personal lack of consumption!" However, he thoroughly enjoys the aroma of fresh-roasted coffee, and performing taste evaluations of the various coffee blends is a pleasant challenge. Experienced tasters do not swallow the

coffee, but merely swish it around in their mouths to get the flavor of the coffee.

When the cost of coffee skyrocketed in the 70s, Nestle sought to make an instant coffee using a cheaper alternative as a coffee extender. They called upon their team of scientists and asked them to do the seemingly impossible. When Sunrise coffee was introduced in 1977, using chicory as a main ingredient, the

"impossible" was scientifically accomplished. Several years later, Phil was a member of the team that developed a similar coffee/chicory blend named Mountain Blend which went on the market in 1986, and he was directly involved with the sensory and analytical evaluations of the product.

Since that time, Phil has moved into more managerial facets of work. Although he has spent time in lab supervision, method development, and instrumental analysis, he now finds himself working primarily with quality systems development and implementation. While he spends much of his time training quality assurance personnel and food factory employees or writing reports and documentation, he still enjoys the time he spends in qualitative analysis of foreign matter found in food products. It is this time, when he is viewing life "under the microscope," that he is often reminded of his time spent in lab at Cedarville College.

## Today's Forecast: Cirrus Clouds

Matt Boehm '96 developed an interest in meteorology in high school. Knowing that the weather could hold sunshine or rain, cold or warm temperatures helped prepare Matt for the day, but his math major at Cedarville College prepared Matt for doctoral studies at Penn State University. "Meteorology is applied mathematics," states Matt, "and the math courses at Cedarville College prepared me well for the Ph.D. challenge." Matt began his doctoral studies in 1996 following graduation and anticipates completion of his dissertation by December 2000. He will spend the next two years conducting research for and writing his dissertation.

Matt is a research assistant with the university, which allows him the time to work on his dissertation on the numerical modeling of cirrus clouds. Simply stated, Matt is using a computer simulation of cirrus clouds in the tropic region to find out how the clouds get to that destination and why they stay so long in the tropics. Cirrus clouds impact radiation upon entering and leaving the earth's atmosphere and ultimately affect climate change. Matt will study why this occurs, and the computer model helps demonstrate this. Prior to choosing Penn State's program, Matt sought the advice of his Cedarville College professors in making the final decision to go straight for a doctorate. Dr. James Sellers, Dr. Steve Gollmer, and Matt's advisor, Dr. Lee Eimers, all influenced Matt's decision.

On sunny days Matt enjoys bike riding on Pennsylvania's mountain trails. Matt is also actively involved with Campus Bible

Fellowship and will begin his second year as organization president in 1998-99. Campus Bible Fellowship is a ministry of Baptist Mid-Missions and is supported by Faith Baptist Church in State College, Pennsylvania. The group of 15 meets once a week for Bible study, testimony, and prayer. As president, Matt oversees the weekly meetings, weekend activities, and bi-yearly retreats. Matt carries a challenge with him from his senior year at Cedarville. "Dr. Dixon, along with many guest speakers, challenged the student body to be light and salt to a world that needs Christ," Matt recalls. He is thankful for the opportunity to fulfill that challenge in a primarily non-Christian environment.

Matt heard about Cedarville College from a Master's Puppets team that came to his home church. Since then he has successfully encouraged his younger siblings to attend Cedarville, too. His sister, Michelle, is a 1998 graduate with an elementary education degree, and brother Michael is currently a junior studying youth ministry.

# Heritage Corner

## Retired Teachers Gather At Cedarville College

Thirty-two retired educators who attended Cedarville College met on Monday, July 6 for a wonderful luncheon, program, and time of fellowship. Marge Lott Bodwell '42 gave an insightful presentation entitled "The American Eagle in History and the Bible." Marge brought porcelain pieces from her American bald eagle collection to be used as centerpieces. Bernice Bryant Roberts '31 celebrated her 80th birthday with

her fellow educators during the luncheon, and she was presented with a wonderful birthday bouquet to take home. Helen O'Bryant '44 and her cousin Bea O'Bryant Thompson '45 are planning a delightful time for the group's next meeting, scheduled for July 12, 1999.

## Roommates Revisit

**D**uring the June Heritage Alumni outing to Ye Ole McDonald Homestead and Farm, est. 1801 in Xenia, Ohio, family homestead of Margaretta Lott Bodwell '42, a wonderful reunion took place. The day began with 17 Cedarville College Heritage Alumni ready to enjoy an old-fashioned summer picnic. Marge gave a tour of the outside and inside of the homestead, the original cabin, the original spring house, tool workshop, and barn. She also shared many stories of family history, priceless collectibles, and renovation woes and wows. In one particular room, which Marge calls the Iris Room, Marge revealed to her guests that her Cedarville College roommate from Mansfield, Ohio had assisted in hanging the wallpaper for the room. Then Marge introduced former roommate Emma Mae Stebbins Barber '42 to the group as Mae entered through the back door. Mae had driven from Mansfield for the outing! All enjoyed the day touring the homestead and reminiscing about Cedarville College.

Marge Lott Bodwell '42 (sitting) and Mae Stebbins Barber '42 enjoy the opportunity to get together at Marge's home.

## Take Me Out To The Ballgame!

The Cedarville College Heritage Alumni group traveled to Cinergy Field in Cincinnati on July 30, 1998 to watch the Cincinnati Reds play the Atlanta Braves. The Reds were defeated 13 to 4. Eleven alumni enjoyed lunch on Mike Fink's Riverboat Restaurant before the game.

## Calendar of Events

**October 16 Homecoming Luncheon Banquet**  
President's Dining Room, College Center  
Join your classmates and friends Friday for the State of the College Address at 10 a.m. in the Dixon Ministry Center. The luncheon will follow. After the meal, the group will tour the Technology Resource Center (retrofitted chapel).

**For more information on these events, call the Alumni Office at 1-800-837-2566.**

## Summer Studies 1998

Thirty-nine students, having just completed their junior year of high school, entered Cedarville College to be a part of the Summer Studies program. Designed so that students can receive college credit by taking classes ranging from earth and space science to racquetball, the benefits of the program go beyond the classroom experience.

Living in the dormitory provides the students with firsthand experience of college life. Additional activities, including trips to Kings Island, a Cincinnati Reds game, the epic outdoor drama *Blue Jacket*, and Captain Bogey's, offered many opportunities to relax and develop lasting friendships. Worship times in area churches on Sundays and together as a group on Wednesday nights served as a spark to ignite many areas of spiritual growth.

Ultimately, in addition to developing friendships, the students experienced academic and spiritual development, providing what alumni have come to know as "the Cedarville experience."

**G**enesis 2:7 "And the Lord God formed the man of the dust of the ground and breathed into his nostrils the breath of life, and the man became a living being." God gave man life, and therefore life is precious. Last fall, Dr. Dixon delivered a series on the sanctity of life, reaffirming the College's stand on issues such as abortion, capital punishment, suicide, and euthanasia.

For audio tapes of the series, contact CDR Radio at 1-800-333-0601.

For video tapes of the series contact Cedarville College Audio-Visual Services at 1-937-766-7853.

**T**he Council on Social Work Education has granted initial accreditation to the Cedarville College social work baccalaureate degree program. This accreditation is retroactive to the 1995-96 graduating class and is valid until June 2002. At that time, the program will be reviewed for continued accreditation. Accreditation will enable students to sit for the social work licensure exam in all 50 states and to qualify for advance standing graduate programs. Academic Vice President Dr. Duane Wood says that accreditation "will greatly enhance the professional job opportunities" for students. Cynthia Sutter-Tkel, director of the social work program, and the social work faculty are to be commended for achieving this significant milestone in the development of their program.

**T**he technology planning committee of Cedarville College announced the following grants as part of a faculty incentive program for 1998. Of the eight stipends made, four were granted to professors in the Department of Science and Mathematics. The potential impact on a large number of students and the potential cross-departmental impact were factors considered in selecting recipients. Those who earned the grants will be reporting the results of their work in the fall. The grants range from \$500 to \$1500.

**C**onstruction aimed at retrofitting the former chapel building into a high-tech classroom facility by fall quarter 1998 continues. When completed, the Center will include two 84-seat general classrooms, four computer classrooms, a commuter lounge, and space for two of Cedarville's newest initiatives—distance learning and graduate programs. The former chapel building was used for offices and other activities following the October 1996 completion of the new Jeremiah Chapel in the Dixon Ministry Center. The retrofitted Technology Resource Center further positions the College as a leader in campus computer networking.

# Cedarville Develops

## Earth Science Program

Like many little boys, John Whitmore collected rocks as a kid. And after an eighth grade field trip hunting for fossils, he knew he wanted to become a geologist. John holds a bachelor of science degree in geology from Kent State University and a master of science degree in geology from the Institute for Creation Research. This fall, he will begin doctoral studies in paleontology at Loma Linda University in California.

Since coming to Cedarville as assistant professor of geology in 1991, John has been instrumental in the development of an earth science minor, which requires classes such as "Historical Geology" and "Oceanography." In 1998, Cedarville graduated its first student with the earth science minor. In the future, the Department would like to offer majors in both earth science and geology.

For the Whitmores, geology is a family affair. John's wife, Jamie, and their three-year-old daughter, Victoria, occasionally accompany him on class field trips. Victoria can name more dinosaurs than most adults, and their two cats are even named after rock types—Igneous and Galina! The Whitmores recently welcomed another daughter, Jocelyn (3 months), who has her own collection of stuffed dinosaurs! They attend Southgate Baptist Church in Springfield, Ohio. John often speaks in churches and schools on the topics of biblical creationism and geology.

### Local Learning

While textbook knowledge is important, John maintains that the best learning comes from in-the-field experience. Several areas in southwestern Ohio provide opportunities for geological study. On class field trips, students observe rock falls at Massie's Creek, analyze glacial features at the Yellow Spring, and dig for fossils in Waynesville and Delaware.

## Go West, Young People!

In 1996, John Whitmore led a group of six Cedarville College students through the western United States to study landslides, mountain building, floods, fossils, and glaciers. This "Introduction to Physical Geology" class came to life as students viewed firsthand the Tetons in Wyoming, petrified tree stumps in Colorado, geysers in Yellowstone National Park, and other natural wonders.

# YELLOWSTONE NATIONAL PARK

The beauty and majesty of God's creation is displayed at Lower Falls in Yellowstone National Park.

# ROCKY Mountains

# The Alaskan Adventure

In July 1994, John Whitmore and four other creation scientists traveled to the North Slope of Alaska in search of frozen, unfossilized dinosaur bones. By identifying biomolecules and organic remains in these bones, they plan to show that the dinosaur remains, as well as the Earth, are only thousands, not millions of years old. Their many adventures included fighting hypothermia while rafting on the Colville River, battling giant mosquitoes, rescuing a team member from quicksand, and dodging rock falls.

A book journaling their expedition, *The Great Alaskan Dinosaur Adventure: A Real Life Journey Through the Frozen Past*, was published in August 1998 by Master Books. To order this book, contact the Cedarville College Bookstore at 937-766-7894.

This jawbone of a *Lambeosaurus* is the first of its kind to be found this far north and is twice the size of any dinosaur mandible found in Alaska. The *Lambeosaurus* is the largest of several kinds of duck-billed dinosaurs, with this jawbone representing one approximately 40 feet long.

Mike Liston, Buddy Davis, Dan Specht, George Detwiler, John Whitmore

Battling exhaustion and hypothermia on the final day of their expedition, the men were rescued by Eskimos who towed them to their rendezvous with the bush plane that would take them home.

The explorers spent two days digging in the Liscomb Bone Bed, which is believed to hold bones mostly from the *Hadrosauridae* family, or the duck-billed dinosaurs. The men dug through several feet of coal and shale to find the frozen bones, both fossilized and unfossilized.

Student Dan Castellini poses by Mushroom Rock in Kansas. Students learned that because the bottom of the structure is composed of softer rock, it weathers and erodes more quickly than the top, thus forming the "mushroom cap."

In the Black Hills of South Dakota, the group was able to follow a geologist on his rounds in the Homestake Gold Mine, the largest operational gold mine in North America.

## CLASS NEWS

### 60s

**Dr. David Warren '64** has accepted the position as the state representative for the Ohio Association of Regular Baptist Churches. A celebration and installation service was held on April 28, 1998 at the First Baptist Church of Medina. Warren earned his Th.M. at Dallas Theological Seminary, pastored several churches, taught at Faith Baptist Bible College, and in 1980 returned to teach at Cedarville College. In 1997 Warren received an honorary doctor of divinity from Grand Rapids Baptist Seminary for work done in the classroom, in churches, and in writing. Dr. Warren and his wife, **Pat (Schonscheck '63)**, have four children who are all actively serving the Lord. Pat completed her M.A. in English from Wright State University in 1992.

**Dianne Chaffe Gottwals '69** received a 10-year service award from Cedarville College. Dianne works in the Media Resource Center as a graphics assistant.

### 70s

**Preston Butcher '70** was selected for the Senior Executive Program with the Internal Revenue Service. Preston, his wife, Ruth, and son, Cameron, live in Florida. Their daughter, Amy, graduated from Cedarville College in 1997.

**Phyllis Coder Beck '73N** and son, **Tim Beck '98** encouraged their entire computer class to visit the Cedarville College website at the New Horizons Learning Center in Boise, Idaho this summer. The teacher was so impressed with the pictures of campus on the computer that everyone surfed the net to "cedarville.edu" and used the Dixon Ministry Center as their desktop wallpaper! Phyllis teaches junior high at Nampa Christian School; husband, **Dave '71**, is an insurance account executive; son, **Matt '98** married **Marie Lyons '98**; Benjamin begins his freshman year at Cedarville College this fall; and Tim is a sophomore in high school. **Luann Robb Nicholas '74** received a Centennial Library Distinguished Service Award. Luann works as a circulation services manager.

**Dawna Robb Henslin '76** was named the 1998 Teacher of the Year. Dawna teaches first grade in the Dodge Center Public Schools in Minnesota. Her husband, **Tom '76**, is a farmer.

**Mark Seeley '77** accepted the position of vice president for development at Reformed Theological Seminary/Charlotte in 1997. Mark earned his Master of Divinity degree at RTS and has been employed in several capacities that helped develop the needed skills for this position. Mark met his wife, **Nancy (Dear '77)**, in a freshman speech class at Cedarville College. The Seeleys have four children.

**Bryan Waggoner '77** served as team leader for the Youth Alive ministry of Bethesda Baptist Church in Brownsburg, Indiana. The group of 23 high school students assisted missionaries in England and Scotland from June 4-13. Bryan is a youth pastor at Bethesda Baptist Church and is married to **Sharon Levin '80**.

**John Alvey '78** is working for Itinerant Preaching Ministry, filling pulpits when and where needed. He is stationed at Ft. Hood in Killeen, Texas.

**Debra Cullen '78** recently published a unique training system for spiritual childbirth entitled *New Birth: The Story and The Certificate*. The booklet includes a two-sided card or "the birth certificate." One side of the card is used as a visual aid to present the Gospel, and after a decision is made for salvation, the other side of the card is used to document the new birth. For more information, please contact Debra at Wellspring Resources, P.O. Box 545, Medina, NY 14103.

**Linda Divan '79N** serves Cedarville College in the Centennial Library as a collection services manager and was recently recognized for 20 years of service.

**Dee Jackson Haynes '79** and **Deb Jackson Searles '81** performed in Ohio churches during July 1998. The Jackson sisters continue to sing and record together, performing most concerts in the summer and spending family vacation time

together. On July 22, 1998, Camden Baptist Church in Oberlin, Ohio, where **Cal Searles '77** is senior pastor, was struck by lightning and burned to the ground. Continue to pray for the congregation and for Cal and Debbie as they overcome this tragedy.

**Allen '79** and **Janice Zachary Webber '79** met **Dwight '79** and **Cindy Jindra Strickland '79** in Washington, D.C. at Ford's Theatre in July 1998 while on vacation. Janice was wearing her Cedarville College Alumni T-shirt, and the tour guide asked her where Cedarville was. Cindy, sitting in the next row back, overheard and said, "I'm a Cedarville graduate, too!" An informal, small alumni reunion followed!

### 80s

**Michael Stephens '80** was named a recipient of the "40 Under 40 Award" which is sponsored by *The Business News* and C.H. Dean and Associates in Dayton, Ohio. Mike is president of Greene Memorial Hospital in Xenia, Ohio and executive director of Med-Health Systems located in Greene County, Ohio.

**Bonnie Vesilko Price '81** completed a master's degree in humanities/interdisciplinary studies at Houston Baptist University in 1998. She teaches composition at a local junior college and co-owns/administrates Lake Houston Academy, a private academic school grades 6-12.

**John Balacius '82** and his wife, Ann, recently moved from Elizabethton, Tennessee to Philadelphia, Pennsylvania where John will begin medical school at Jefferson Medical College. Ann works for Management Recruiters of Philadelphia. John has undergraduate and master's degrees in psychology.

**Dave '83** and **Lenna Barrand Black '82** serve at Riverview Church near Cleveland, Ohio. Dave is the associate pastor in charge of the youth ministry and Lenna serves as secretary. They just completed a missions trip to Brazil with 10 teens from the church. The team visited Cedarville College graduates **Dave '81** and **Carol Sue Cox Merkh '82** and **Dave '82** and **Cynthia Ulmer Cox '83N** while in Brazil. The Blacks have three daughters: Jessica (14), Jordan (12), and Jenna (9). All look forward to attending Cedarville College in the future.

**Connie Carr '83** has joined the corporate law division of the law firm of Seeley, Savidge & Ebert, L.P.A. where she will focus on general corporate law, securities, regulatory issues, and condominium development and management law. Connie received her law degree in 1990 from The American University in Washington, D.C.

**Karen White Parman '84** (left), a kitchen consultant with The Pampered Chef, co-presented a workshop on the topic of theme shows at the national conference held in Chicago on July 20-22. She was also awarded the company's most prestigious

award of "Top Performance Cluster" in the category of first line cluster sales with yearly cluster sales of over \$375,000. Karen has been with The Pampered Chef since May 1994 and holds the title of advanced sales director. For Karen, the job is a blessing! Representing a company that is run by a Christian who values the importance of family meal times, working as much or as little as she wants, and using the job as an avenue for ministry is everything Karen hoped for. "You can have your cake and eat it too...of course, it tastes much better when it's baked on a Pampered Chef Baking Stone!" Karen says. Karen is pictured with the President of Pampered Chef, Doris Christopher, on a President's tour.

**Sherri Wilson Patterson '84** and her husband, Kent, have relocated to Randolph AFB in San Antonio, Texas. Sherri will continue working for the Department of Defense as a budget analyst. Her husband was promoted to major.

**Michael '85** and **Carolyn Curtis Orban '85N** attend First Baptist Church of Medina, Ohio where Michael is teaching drama, family living, and woodworking at First Baptist Christian School. The Orban's have two children: Catherine (7) and Michael (6).

**Scott '86** and **Jane Romig Brooker '86** live in Cincinnati, Ohio where Jane teaches business courses at Lakota West High School, and Scott is a claims adjuster with Progressive Insurance. Jane continues to run the 1500 meters, and Scott coaches. The Brookers have 2 sons: Judson (11) and Matthew (7).

**Anthony '86** and **Sarah Heidorn Goocey '89N**, recently moved to Marietta, Ohio where Tony is a clinical nurse manager in ICU/PICU for Marietta Memorial Hospital. Sarah works for the Turn 10 Company.

**April Augustus Kammeyer '86** is working as a counselor for Family Services of Burlington County in New Jersey. The Kammeyers recently relocated to Shamong, New Jersey. **David Kammeyer '85** works for Opex Corporation as controller.

**David Beverly '87** was ordained to the Gospel ministry on March 20, 1998. David received his master of theological studies from Grand Rapids Baptist Seminary in 1995. He graduated from the School of Church Ministries internship program at Calvary Baptist Church in Grand Rapids, Michigan in January 1998. David and his wife, Lora, have three children and are currently seeking a missions ministry with ABWE.

**Jonathan Popa '89** recently departed to participate in a multinational exercise in the Mediterranean and Baltic Seas aboard the hospital ship *USNS Comfort*. Popa is one of 700 active duty and reserve naval personnel who will participate in Baltic Challenge '98 along with military personnel from eleven European nations.

### 90s

**Glen Bowman '90** earned a Ph.D. in European history in 1997 from the University of Minnesota and was recently appointed assistant professor of history at Chowan College near Norfolk, Virginia. Glen married Maria Westrup in 1996.

**Brian Popenfoose '90** has been promoted to account manager for Latin America sales with Chore-Time Brock's international grain and feed storage systems division. Brian and his wife, Sharren, will continue to reside in Goshen, Indiana with their daughter, Julia.

**Jody Hutchinson Ross, M.D. '90** recently finished her pediatric residency at the Milton S. Hershey Medical Center of the Penn State Geisinger Health System and has accepted a part-time position on the clinical pediatric faculty at the center. Jody is married to **Stephen Ross '89**.

## Men's Soccer Update

**Roger Swigart '90** will serve as head coach for the Yellow Jacket men's soccer team as **John McGillivray '70** steps into a new role as chair of the Department of Exercise and Sport Science. Coach McGillivray will also devote time to coaching and developing the women's soccer program in its

second year of existence. McGillivray posted a 215-197-27 record in 24 years as head coach of the men's team. Swigart has extensive soccer experience as both a player and coach. He was at Pillsbury College in Minnesota for the 1993 through 1995 campaigns and was the Comets' head soccer coach. He has played professionally for the Charlotte Eagles. Swigart has been heavily involved in missions to England and Bangladesh with soccer teams.

**Paolo Gonzalez '91** began seminary at the International School of Theology/Asia. While in the Philippines, Paolo is serving Greenhills Christian Fellowship. He also began a medical mission foundation called LifeWorks. The foundation's purpose is to serve tribal communities in the Philippines with medicine and the Gospel.

**Sheri Larkin '91** is stationed at Ft. Campbell, Kentucky and is assigned to the 101st Airborne Division Air Assault Band. Sheri will complete her armed services commitment in two years.

**David '93** and **Anna Maxon Crandall '93** have moved to Olathe, Kansas. David earned a juris doctor degree, *cum laude*, from New York Law School in June 1998.

**Steve Hoewing '93** started with the MIS department at Zexel USA of Decatur, Illinois, in May 1998 as a system analyst. This change follows five years with Morgan Distribution, a major wholesaler of Andersen Windows and millwork materials. Steve and his wife, Monica, have two children.

**Matthew Martens '93** has completed his service as a law clerk to Chief Justice William H. Rehnquist at the U.S. Supreme Court. He has joined the litigation department in the Washington, D.C. office of the Los Angeles-based firm, Latham & Watkins, where he will specialize in appellate litigation and white-collar criminal defense.

**Paul '93** and **Lisa Davidson McGrady '89** reside in Park Forest, Illinois and attend Hickory Creek Community Church. Paul works for TRU\*SERV, the parent for True Value Hardware, as a corporate lawyer and is working toward a second master's degree in political science from Governor's Community College. Lisa looks forward to completing doctoral studies in English at Purdue University.

**Susan Beach Varotti '93** currently works for Sithe Energies in Manhattan. The company builds power plants around the world. **Marcus Varotti '96** works for Donaldson, Luufkin, and Jenrette. The Varottis returned to the U.S. from Brazil in March 1998.

**Darryl Hammock '94** earned his master of divinity degree from The Southern Baptist Theological Seminary in Louisville, Kentucky on May 22, 1998. Darryl is married to **Wendy Weyand '95**.

**Kevin Shoop '94** earned a master of arts in English from Bowling Green State University in Ohio this spring. He began work at Boise Marketing Services in Toledo and is developing their intranet pages.

**Alicia Bennett '95** addressed Indiana Governor Frank O'Bannon's roundtable on community service in Indianapolis, after completing two terms as an AmeriCorps volunteer last October. Alicia will begin her second year at Purdue University as a graduate student and teaching assistant in the creative writing fiction program where she is pursuing an MFA. Alicia lives in Lafayette, Indiana.

**John Cooley '95** graduated *magna cum laude* at Washington and Lee University School of Law on May 17, 1998. He joins the law office of Wooten and Hart in Roanoke, Virginia.

**Lindsay Hamel '95N** earned a bachelor of arts in sociology and was recently hired as a counselor in a residential women and children's program at Mel Trotter Ministries in Grand Rapids, Michigan. Lindsay attends Rockford Springs Community Church.

**Troy Hamilton '95**, **Devon Berry '95**, **Mark Irving '94**, and **Jeff Miller '94** (not pictured) joined forces over the summer. These four men made a commitment to reunite in order to pool efforts for a time of ministry, mutual sharpening, and labor. God led them to Grace Baptist Church in Bellingham, Washington—Mark's home church. The men have kept busy preaching for the services, teaching Bible studies, painting the exterior of the church building, and starting several evangelistic outreaches in the community. Troy has

recently returned from missionary service in Mozambique, Africa and will attend Columbia Biblical Seminary. Devon is a graduate student at Case Western Reserve University in Cleveland, Ohio. He has completed his master of nursing and will finish a doctor of nursing by February 1999. Mark attends Dallas Theological Seminary and serves as youth pastor at Dallas Bible Church. Jeff is a resident director at Cedarville College. **Scott Hartley '95** earned his MBA with specialization in finance and operations management from the University of Scranton in Pennsylvania. Scott served as a graduate assistant in the school of management before taking a job as a design engineer in the life support business group at Gentex Corporation. At Gentex his responsibilities include program management, design engineering, and new product development of protective equipment used in military applications. Scott was selected for Tau Beta Alpha, Beta Gamma Sigma, and Who's Who in American Universities and Colleges.

**Christine Illjes Reid '95** and her husband, Andrew, are running an 800-acre red deer ranch in Copenhagen, New York.

**Bryan '96 and Amy Hoop Jefferies '96** recently moved to Indianapolis. Bryan is in his third year of medical school at the Indiana University School of Medicine and works in the emergency room at St. Francis Hospital. Amy is currently working as a nurse in the neonatal intensive care unit at Methodist Hospital.

**Carol Lee '96** began her master's degree studies at Miami University in Oxford, Ohio. She will study college student personnel.

**Kathleen Revlinger '96** is teaching special education in the Wilson Reading Program at Penridge High School in Perkasee, Pennsylvania. Kathleen and her husband, Stephen, anticipate the arrival of their first child.

**Tanya Nicholson Zelem '96**, and her husband, Robert, are buying their first home in Wake Forest, North Carolina.

**Heather Marsceau '97** will begin classes at Dallas Theological Seminary this fall.

**Lisa VanWormer '97** works as a technical communicator for Datastream Systems, Inc. in Greenville, South Carolina.

**Brad Bartlett '98** lives in Durham, North Carolina where he works for IBM Corporation as an information developer. Brad is engaged to **Tanya Brockman '97**.

**Stephanie Dickerson '98** accepted a job at Spartanburg Regional Health Care as a nurse on the medical/surgical floor.

## FOCUS ON THE FIELD

**Jeannie Lockerbie Stephenson '61** and her husband, Wally, spent March 1998 in South Africa, where Wally had served as a missionary. The Stephensons spoke in seminars, churches, homes, and a weekend church camp. They currently serve in the Pennsylvania home office for Association of Baptists for World Evangelism (ABWE).

**Irene Benson '63** has returned to the United States for six months of home ministry. In December 1998, she will return to Brazil and her work among the WaiWai Indians.

**Grace Trimble Kintner '67N** and her husband, Dave, have joined the maintenance staff at Missionary Acres, Baptist Mid-Missions' retirement facility in Silva, Missouri.

**Ken Cole '70** and his wife, Alice, will be living in Fort Wayne, Indiana during this year of home ministry. The Coles serve with ABWE in Bangladesh.

**Vic Millard '75** and his wife, Cyndi, work with Campus Bible Fellowship at Lock Haven University in Pennsylvania. They praise the Lord for an average 35 students that participated this past year in a weekly study on Philippians and I Peter. They also conduct a number of one-on-one Bible studies. Vic and Cyndi celebrated their 25th wedding anniversary on August 8, 1998 with a dinner at First Baptist Church in Bellefonte, Pennsylvania.

**Evandro Batista '77** and his family are on furlough from their church-planting ministry in Portugal with ABWE. They will be living in Pemberton, New Jersey.

**Russ '88 and Melody Dillon Wight '90** are AWANA missionaries in western Kansas, southern Colorado, and the Oklahoma panhandle. They have a daughter, Kimberly (2).

**Jon '90 and Lori Rogers Haskell '90** serve as missionaries in Hungary with ABWE. This summer, they participated in English language programs taught by Cedarville College teams in Budapest, Kecskemet, and Nagykanizsa. During the furloughs of several veteran missionaries, Jon has recently assumed financial responsibilities for the Hungarian mission team. As Jon and Lori continue in language study, they are taking opportunities for evangelism and discipling with families in their neighborhood.

**Bobby '90 and Sara Sweetland Hile '92** are living in Michigan during this year of home ministry. Ministering in Durban, South Africa, the Hiles work in church planting, as well as youth and radio ministries. They have two children: Abigail (3) and Andrew (1).

**Amy Brien Eagle '94** and her husband, Johnnie, minister with Inner City Impact in Chicago, Illinois.

**Brenda Sprankle '94** has completed a year of missionary service in Tóalmás, Hungary. Brenda taught English classes at the Word of Life Bible School and in the village public school. In June, she attended WOL's Missionary in Training program and has been accepted for full-time ministry in Hungary.

**Allan McGuire '95** and his wife, Joyce, recently arrived in Swaziland, Africa for their ministry with Trans World Radio (TWR). Allan is being

trained as a shift engineer and operator at the transmitter site in Manzini. Joyce is a secretary in the TWR office and helps with weekly children's Bible clubs.

**Rhonda Carnahan '96** is working in public relations with Christian Mission Aid (CMA) based in Kenya. She is responsible for their quarterly newsletter, reports and appeals, promotional photo albums and videos, and other means of communicating with donors. She travels to project sites throughout Kenya, Uganda, and South Sudan for photo shoots and interviews.

**Brooke Frazier '97** has been accepted as a short-term missionary with The Evangelical Alliance Mission (TEAM). In September 1998, she will travel to Lublin, Poland for a nine-month assignment. She will be involved in evangelism, discipling, and teaching English.

## ONE IN CHRIST

**Jonathan Sachs '84** and his wife, Laura, were married May 9, 1998 at Grace Christian Reformed Church in Chatham, Ontario. They met through a community choir in which Laura performed as a soprano soloist. Jonathan recently began working for Keane Computer Consultants in Southfield, Michigan.

**Jane Sparling '85** and Gary Pych were married April 18, 1998 at Bible Baptist Church in Hasbrouck Heights, New Jersey and honeymooned in Hawaii. The Pychs have settled in Garfield, New Jersey. The Williams reside in Kalamazoo, Michigan.

## Ormsbee Marries

**David Ormsbee '78**, vice president of enrollment management at Cedarville College, married Joni Stacy in an evening ceremony at the Dixon Ministry Center on July 25, 1998. The ceremony featured traditional customs and an international flair. Twelve couples stood for the bride and groom, a custom taken from Brazilian culture. From New Testament times, Dave and Joni borrowed the tradition of the groom escorting the bride to the ceremony. This was symbolized by Dave meeting Joni as she walked down the aisle.

Dave and Joni first met through their mutual friends **Roscoe '82** and **Rhonda Crist Smith '83**. Joni taught high school mathematics in the Beavercreek, Ohio school district and joins the Cedarville College Department of Science and Mathematics faculty this fall. The couple reside in Fairborn, Ohio.

## IN MEMORY OF

**Arlene Nightingale Genutis '68** died on May 21, 1998. After gaining her elementary education degree at Cedarville, Arlene went on to teach school in Maryland, Missouri, Ohio, and New Jersey. She was involved in her church library, missions committee, and women's ministry. We offer our sympathy to her husband, Allen, of Elwell, Michigan.

**Larry Harris '82** died of a heart attack on July 13, 1998 at the age of 54. Larry was the pastor of Bible Missionary Church in Wilmington, Ohio. We extend our sympathies to his church family, his wife Eleanor, and his children, **Larry '87N**, Daniel, David, Larita, Philip, Stephen, and Timothy.

## Hawkins Receives Honorary Doctorate

The Cedarville College Board of Trustees awarded the honorary degree of Doctor of Divinity to Pastor Eddie L. Hawkins at the June commencement ceremony. Dr. Hawkins is the senior pastor of Good Shepherd Baptist Church of Cleveland, Ohio.

Cedarville College President Dr. Paul Dixon conferred the degree and said, "Eddie Hawkins is a man greatly used by God in the ministry of His Word. Born in Studgard, Arkansas, Brother Hawkins graduated from high school in Flint, Michigan and prepared for ministry at the Baptist School of the Bible in Cleveland, Ohio. He founded the Good Shepherd Baptist Church of Cleveland in 1962, the year he graduated from Bible School. He continues as the Senior Pastor [at the church] which has grown under his leadership from the initial membership of twelve people to a congregation in excess of two thousand."

"Pastor Hawkins ministry has extended far beyond the church. He has actively prepared others for effective ministry through his church and through his teaching at the Baptist Bible Institute of Cleveland and the Central Bible College of Cleveland. He and his congregation have started two other churches in the Cleveland area. He is Chairman of the Board of the Cleveland Baptist Bible College, and he has served on the Board of Trustees of Cedarville College since 1994."

"Pastor Hawkins is a man of great grace and dignity. He is also a man to whom God has entrusted a great deal of influence, and we are grateful that he has chosen to be an advocate for Cedarville College," Dr. Dixon concluded.

**We've Moved  
To Serve You  
Better!**

*Visit our new office at  
Homecoming!*

**T**he Alumni Office is thrilled to announce that on July 1, 1998 we relocated to the George S. Milner Business Administration Building! Our beautiful new location offers so many benefits. Most importantly, we are easier to find, more centrally-located, and we now have the space to receive our alumni guests. With more than twice the space, we have a reception area which offers

alumni a place to visit, look through old yearbooks, have a cup of coffee, and update us on what's new. Additional work stations have also been added to accommodate our growing staff.

Be sure to stop by the Alumni Office in Milner 6 the next time you're on campus. Pick up a campus map or other literature, find out what's going on around campus, and chat for a while. We look forward to seeing you!
